### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 7 and 15 are objected to because of the following informalities: In claim 7, "a second transversely extending pin" is confusing, as a first had not previously been set forth". In the action which follows, it will be assumed claim 7 depends from claim 3.

Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1,2,10 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leva in view of Knox.

Leva discloses the field of the invention, including a finbox mounted within the board, and a manually detent adjustable fin system, including a foot. Leva fails to disclose and overlying relationship of fin to box.

Knox teaches same.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have the fin reside over the fin box of Leva as taught by Knox.

Such a combination would have been desirable at the time of the invention so as to provide increased stability/strength of the fin, as well as an inherent seal.

4. Claims 7-9,11-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
